Project Proposal

Due Date: Oct 11, 2024
Type: Term Team Project Grade:
        5% of the f nal project

Prepare and submit a proposal for the Project with the following structure.

1. **Title page.** The name of the project, group number, name of the team and the name of each team member (to select a group visit the course shell on Slate then go to Managment>groups)

2. **Project Overview**. A few paragraphs describing the purpose of the applicaton , development environment

3. **User Interface Wireframes**. Create a wireframe in Visual Paradigm (use the Desktop Wireframe) for each of the page the applicaton will have. The wireframe should be f lled out with fake data and annotatons such that it is clear how it is used. The wireframes must be presented in the proposal to show the workf ow of the applicaton (wireframes can be exported as images and included in the document). Describe the purpose of each screen in terms of inputs, outputs and user interact on.

4. **Work Assignments**. For each member of the team def ne. The overall tasks the team member is responsible for divided by ter: presentat on (screen), business logic (classes other than UI or Data) and data. Work assignments must be all encompassing with each team member having to implement the UI, business logic and data programming for the features they are responsible for.

Notes

The proposal is not f nal. During development, certain functonality may be changed, modifed, added or removed. So will the design you initally thought of. This is a part of any healthy development process. The *proposal must be updated before the project is completed* and presented together with the project. The proposal itself is worth **5% of the total project grade as part of the project management grade.**
